EXAMINER'S COMMENTS

Response to Arguments

1. Applicant's arguments filed 8/23/2006 have been fully considered and are persuasive.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art could not alone or in combination anticipate or make obvious a filling plant conveyor arrangement to transport containers with an input to receive a stream of containers, first conveyor structure and a second conveyor structure, each of which receives a portion of the stream of containers from the input, the first conveyor structure and the second conveyor structure diverging from one another at a point of divergence.

The most pertinent prior art, VAMVAKAS, discloses a container filling plant conveyor arrangement with an input stream of conveyors that convey containers. A first conveyor (slow) and a second conveyor (fast) receive the containers at a first end and convey them to the second end where the stream of containers diverges due to a guide tip that separates the container stream and shunts them onto separate conveyors. However, while VAMVAKAS discloses the container stream diverging, it does so by diverging the container stream onto other, parallel, conveyors and does not disclose the conveyor belts themselves diverging.
